To Whom It May Concern,

Subject: Recommendation for Cloud Engineering Role (Mehdi Ougadi)

I am pleased to recommend Mehdi Ougadi for a Cloud Engineering position. As the course instructor for an Advanced Concepts of Cloud Computing course in the Department of Computer Engineering and Software Engineering at Polytechnique Montréal, I had Mehdi as one of my students during the Fall 2025 semester.

Throughout the course activities, including lectures, assignments, laboratory sessions, and presentations, Mehdi consistently demonstrated strong motivation, intellectual curiosity, and a clear willingness to advance his skills in cloud computing. His engagement and performance reflected a solid grasp of both theoretical and practical aspects of the cloud computing. By the end of the course, he had developed a strong understanding of core cloud computing principles and demonstrated the ability to design and deploy cloud-native applications, particularly in the areas of Infrastructure as a Service (IaaS).

Based on Mehdi's strong academic performance, sound understanding of cloud computing principles, and demonstrated practical skills, especially through the course laboratory work, I strongly recommend him for a Cloud Engineering role.

Please feel free to contact me should you require any additional information.

Sincerely,

*Hyacinth Ali*
